

## POLÍTICA DE GESTÃO

QUALIDADE, AMBIENTE E SEGURANÇA

ANYWIND tries to keep, throughout its activity, a solid path, sustained in a dynamic attitude that bets on the continuous improvement of Installation, Commissioning, Maintenance, Repair and Retrofitting activities of Wind Turbines.

With the aim of being well-known for its posture towards Quality responsibility of its services, environmental sustainability and respect for Health and Safety at Work, ANYWIND'S Management defined as commitments:

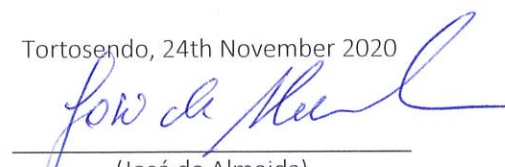

- To ensure that the provided services have the necessary quality level to satisfy and surpass the clients needs and expectations, as well as the other interested parties.
- To develop the activity by ensuring compliance with applicable obligations, including applicable legislation, quality requirements, environment and safety and health of work;
- To ensure the protection culture existence of the environment by all employees and make efforts to influence suppliers and customers to take on a similar environmental strategy in order to prevent pollution, use resources in a sustainable way, promote mitigation and adaptation to climate change and protect biodiversity and ecosystems;
- To actively work to eliminate hazards and reduce SST risks in order to provide safe and healthy working conditions for the work-related injuries and health conditions prevention, with focus on activities carried out in ANYWIND workplaces, including its facilities and wind farms where it provides services;
- To promote training and raise awareness of all its employees, encouraging their involvement, consultation and participation in the management system, and in the overall performance of the company;
- Activity's periodic monitoring, objectives, practices, processes and procedures in order to promote and encourage the continuous improvement of the Management System, in order to meet the stakeholders' expectations;
- To ensure the expected return to the partners.

The Policy will be available and communicated to all relevant stakeholders, enabling an effort's convergence to achieve continuous improvement in the quality, environment and safety management system's performance.

For our customers... Any wind moves us!!!
